2. [Setup Process](#)

About The Project

This repository contains the group project for the course **.Net Framework and C#** at the university of applied sciences in Darmstadt, Germany.

The application consists of a backend [WebAPI](#), a frontend [WPF](#) client and a [postgresql](#) database for data storage.

Contributors

Student members of project group:

- [Toubeyas \(Abel, Tobias\)](#)
- [Iron-Mike-Tyson \(de Riese-Meyer, Kevin\)](#)
- [T-hai \(Quang Thai Vu\)](#)

Lecturer:

- [alaluuk \(Alaluukas, Pekka\)](#)

Built With

This chapter contains a list of all technologies that are being used in this project.

Frameworks

- [.NET 6.0](#) for class library and frontend
- [ASP.NET Core 6.0](#) for backend
- [MSTest](#) for unit testing

Security

- Authorization of WebAPI with [JWT](#)

Services

- [Central postgresql server](#) from [h_da](#) as a database (german documentation)

Setup Process
