.NET Framework and C# - Project work - Group 1

Table of Contents

About The Project

This repository contains the group project for the course **.Net Framework and C#** at the university of applied sciences in Darmstadt, Germany.

The application consists of a backend WebAPI, a frontend WPF client and a postgreSQL database for data storage.

Contributors

Student members of project group:

- Toubeyas (Abel, Tobias)
- Iron-Mike-Tyson (de Riese-Meyer, Kevin)
- T-hai (Quang Thai Vu)

Lecturer:

- alaluuk (Alaluukas, Pekka)

Built With

This chapter contains a list of all technologies that are being used in this project.

Frameworks

- .NET 6.0 for class library and frontend
- ASP.NET Core 6.0 for backend
- MSTest for unit testing

**Security**

- Authorization of WebAPI with JWT

Services

- [Central postgresql server](#) from [h_da](#) as a database (german documentation)

Setup Process

/TODO
